HIGHLIGHTS

- Maiden drilling program completed at Lepidolite Hill Project
- A total of 37 holes completed for 4,744m with pegmatites recorded in 33 holes
- Significant assay results include:
 - EFLHRC0001 - 9m at 1.64% Li₂O from 27m incl. 3m at 3.29% Li₂O from 33m
 - EFLHRC0002 - 11m at 2.27% Li₂O from 49m incl. 5m at 3.87% Li₂O from 51m
 - EFLHRC0003 - 11m at 2.63% Li₂O and 401ppm Ta₂O₅ from 67m incl. 6m at 3.10% Li₂O from 67m and 5m at 2.07% Li₂O and 842ppm Ta₂O₅ from 73m
 - EFLHRC0011 - 13m at 1.47% Li₂O and 1.23% Cs₂O from 19m incl. 8m at 2.04% Li₂O and 1.96% Cs₂O from 20m incl. 1m at 14.4% Cs₂O from 24m
 - EFLHRC0022 - 8m at 0.84% Li₂O from 70m incl. 2m at 2.10% Li₂O from 71m
 - EFLHRC0023 - 31m at 0.86% Li₂O from 67m incl. 3m at 1.81% Li₂O and 609ppm Ta₂O₅ from 71m and 5m at 1.88% Li₂O from 93m
 - EFLHRC0024 - 8m at 1.52% Li₂O from 105m incl. 3m at 3.44% Li₂O from 106m
- The high-grade results at shallow depth and the intersection of multiple lithium-bearing pegmatites underpin the premium quality of the lithium mineralisation at Lepidolite Hill Project

Eastern Resources Limited ("EFE" or the "Company") is pleased to provide an overview of the Company's activities for the period ending 31 March 2024 ("Quarter", "Reporting Period").

LEPIDOLITE HILL LITHIUM PROJECT

During the Quarter, the Company conducted a maiden reverse circulation (RC) drilling program at the Lepidolite Hill Lithium Project ("Project").

The program targeted the pegmatites in the area between the existing Lepidolite Hill pit and Tantalite Hill, and East of Signal Hill towards Future Battery Minerals (FBM)'s Kangaroo Hill spodumene project, to assess the potential for extensions of the lithium-bearing pegmatites found at Lepidolite Hill existing pit.

The drilling program was completed early March with a total of 37 drillholes for 4,744 metres with pegmatites recorded in 33 holes. Assay results for the first 15 drillholes have been received, with exceptionally high-grade lithium (Li), tantalum (Ta) and caesium (Cs) mineralisation. Multiple thick intervals have been intersected, including:

- EFLHRC0001 - **9m at 1.64% Li₂O** from 27m incl. **3m at 3.29% Li₂O** from 33m
- EFLHRC0002 - **11m at 2.27% Li₂O** from 49m incl. **5m at 3.87% Li₂O** from 51m
- EFLHRC0003 - **11m at 2.63% Li₂O** and **401ppm Ta₂O₅** from 67m incl. **6m at 3.10% Li₂O** from 67m and **5m at 2.07% Li₂O** and **842ppm Ta₂O₅** from 73m
- EFLHRC0011 - **13m at 1.47% Li₂O** and **1.23% Cs₂O** from 19m incl. **8m at 2.04% Li₂O** and **1.96% Cs₂O** from 20m incl. **1m at 14.4% Cs₂O** from 24m

Results from the first 3 holes drilled in the east were exceptional, containing intervals of more than 2% Li₂O. Most of the lithium in this area appears to be related to petalite and/or spodumene mineralisation (lithium silicates) with limited lepidolite. The newly discovered area is immediately west of spodumene-bearing pegmatites identified at the Kangaroo Hill Lithium project (ref ASX: FBM 17 October 2023). EFLHRC0003 also intercepted significant tantalum mineralisation up to 3,168ppm Ta₂O₅.

Li denotes Li₂O, Ta denotes Ta₂O₅

Figure 1: Selected drill chips - EFLHRC0003

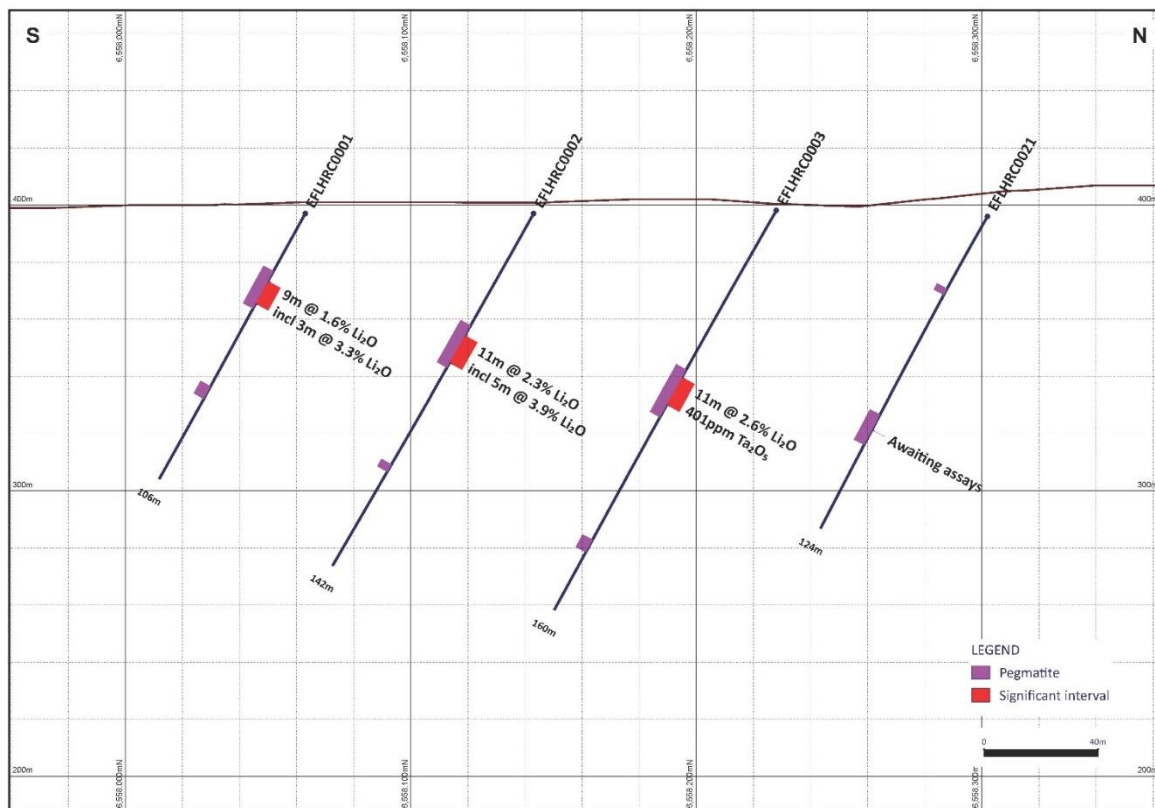

Figure 2: Section 1, 317,240E Looking West

Drill holes EFLHRC0010 and 11 were drilled to test petalite-lepidolite mineralisation mined from the shallow pit completed by WMC (BHP) in the 1970's (ref ASX: EFE 8 May 2023). Significant assay results from drill holes EFLHRC0010 and 11 coincide with the near lithium rich pegmatites drilled by Lithium Australia in 2019 (ref ASX: EFE 8 May 2023).

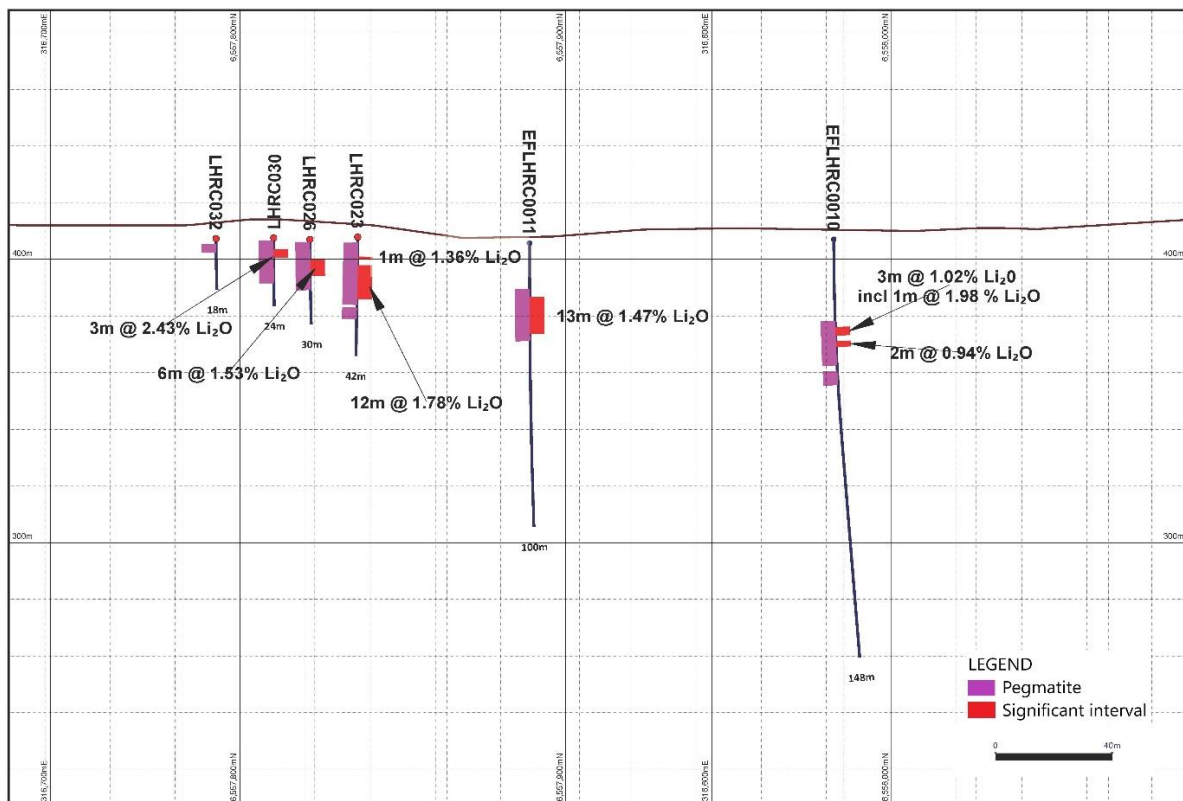

Figure 4: Section 2 – Looking Southwest

The width and grade of lithium mineralisation intercepted in drilling highlights the potential for a significant mineralised system over one kilometre of strike.

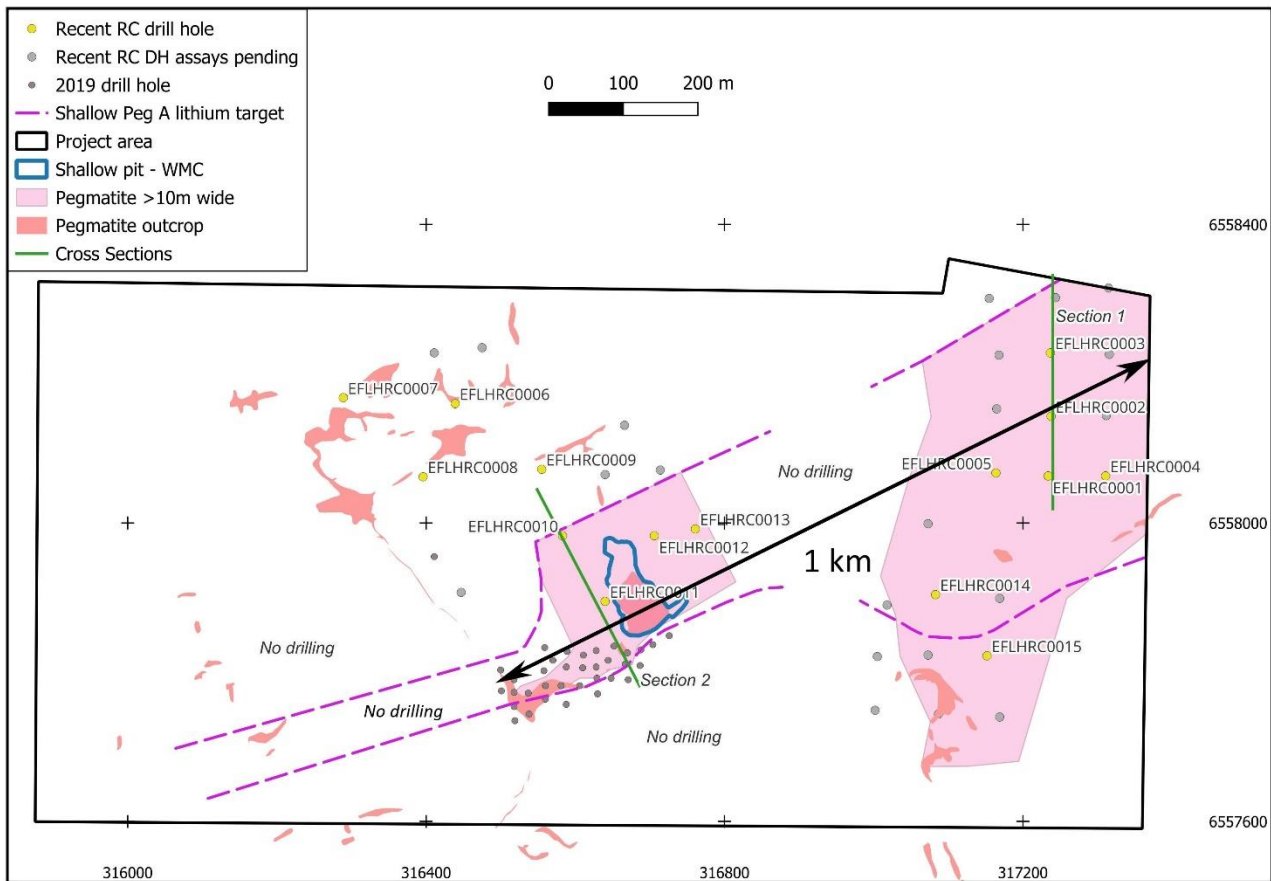

Figure 5: Lepidolite Hill Project, Drill Hole Locations

NOWA NOWA IRON PROJECT

During the Quarter, the Company continued progress on the Environmental Effects Assessment (“EES”) approval process, which is an all-inclusive permitting approach including all planning and operating licence requirements for the development and operation of Nowa Nowa.

The following assessments have been undertaken: Aboriginal Cultural Heritage Impact assessment, Ecology Impact assessment, Traffic Impact assessment and a Groundwater Impact assessment.

NOWA NOWA COPPER PROJECT

No exploration work was carried out during this Quarter.

OTHER LITHIUM PROJECTS

No exploration activities were conducted at the other projects (Trigg Hill, Yalgoo West, and Lake Johnston) during the Quarter.

TAYLOR LOOKOUT PROJECT

In view of the high prospectivity at Lepidolite Hill, the Company has elected to not to exercise its right to earn-in the interest in Taylor Lookout Project. The commercial terms are set out in the Heads of Agreement (ref ASX: 28 February 2022).

NEW PROJECT SEARCH AND POTENTIAL ACQUISITION

A number of projects have been evaluated during the Quarter, and the Company is in commercial discussions with various parties.

FINANCIAL POSITION

The cash and cash equivalents at the end of the quarter is approximately \$4.8 million.

Change of registered office: Effective 1 May 2024, the Company's registered office will move to Level 8, 124 Walker St North Sydney NSW 2060. This is the address of the Company's auditors and, as a result, the St Leonards office has been closed, delivering costs savings of ~\$26,000 per annum.

RELATED PARTY PAYMENTS

During the Quarter, the Company made related party payments, at normal commercial rates, of \$91,000 (Excl GST) for Directors fees and Directors consulting services.

Notes:

1. Eastern Lithium Pty Ltd has 70% ownership of the Tenement and Lithium Australia Ltd has 30% ownership of the Tenement.

SUBSEQUENT TO QUARTER END

Further assay results received from the maiden reverse circulation (RC) drilling program completed in March 2024 at Lepidolite Hill Lithium Project.

The assay results from drill samples in the maiden drilling program confirmed continuity and thickness of lithium mineralisation with multiple stacked shallow north-west dipping lithium-bearing pegmatites to a depth of at least 154m below surface. (refer Table 1).

Drilling has intersected lithium mineralisation up to 31m in thickness (EFLHRC0023 67-98m). Individual 1 metre assays up to 3.87% Li₂O (EFLHRC0002 51-56m) were returned.

Significant intercepts from the total 37 drill holes in maiden drilling program include:

- EFLHRC0001 - **9m at 1.64% Li₂O** from 27m incl. **3m at 3.29% Li₂O** from 33m
- EFLHRC0002 - **11m at 2.27% Li₂O** from 49m incl. **5m at 3.87% Li₂O** from 51m
- EFLHRC0003 - **11m at 2.63% Li₂O** and **401ppm Ta₂O₅** from 67m incl. **6m at 3.10% Li₂O** from 67m and **5m at 2.07% Li₂O** and **842ppm Ta₂O₅** from 73m

- EFLHRC0011 - **13m at 1.47% Li₂O** and **1.23% Cs₂O** from 19m incl. **8m at 2.04% Li₂O** and **1.96% Cs₂O** from 20m incl. **1m at 14.4% Cs₂O** from 24m
- EFLHRC0022 - **8m at 0.84% Li₂O** from 70m incl. **2m at 2.10% Li₂O** from 71m
- EFLHRC0023 - **31m at 0.86% Li₂O** from 67m incl. **3m at 1.81% Li₂O** and **609ppm Ta₂O₅** from 71m and **5m at 1.88% Li₂O** from 93m
- EFLHRC0024 - **8m at 1.52% Li₂O** from 105m incl. **3m at 3.44% Li₂O** from 106m

NSI: No significant intercept

The interval 67-98m within EFLHRC0023 includes multiple pegmatite intercepts and intervals of host greenstone.

Reference to the Company's previous ASX announcements:

- 1 February 2024: Site preparation commenced at Lepidolite Hill
- 7 February 2024: Drilling commenced at Lepidolite Hill
- 21 March 2024: Exceptional high grade drill intercepts at Lepidolite Hill
- 18 April 2024: Further high-grade lithium from Lepidolite Hill

The Company confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcements and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

ABOUT EASTERN RESOURCES LIMITED

Eastern Resources Limited (ASX: EFE) is an Australia based ASX-listed, emergent lithium focused exploration and development company.

The Company is developing the Nowa Nowa Iron Project in East Gippsland, VIC, one of the highest grade magnetite projects in Australia.

The Company owns four lithium projects in Western Australia including:

- Trigg Hill Lithium-Tantalum Project which is strategically located in the historical lithium-tin-tantalum district in the Pilbara (WA).
- Lepidolite Hill Lithium Project (70% interest), where significant lithium mineralisation is identified.
- Yalgoo West Project located in Yalgoo lithium province, adjacent to Waratah Well Lithium Project.
- Lake Johnston Project located in the southern Yilgarn region of WA, and close to Charger Metals' Lake Johnston Lithium Project.

The Company has formed a strategic partnership with two tier 1 lithium converters, providing the Company with excellent coverage over the primary lithium sources:

- Ya Hua International Investment and Development Co. Ltd, a wholly owned subsidiary of Yahua Group which is one of the largest Chinese lithium converters, to acquire and develop spodumene projects, and
- Yongxing Special Materials Technology Co. Ltd. ("Yongxing"), one of the major Chinese lithium converters using lepidolite concentrates as feed to produce battery grade lithium carbonate.

INVESTOR INFORMATION

Further information, previous Company announcements and exploration updates are available at the Investors tab on the Company's website – www.easternresources.com.au

This announcement has been authorised for release by the Board of the Company.
